

TANTRIX, the name, incorporates universal acceptance of knowledge and ideas, of all people no matter what race or personal beliefs, and supports self expression. The concept is of true brotherhood, to unite efforts and strengths to achieve a higher goal, purpose, or experience.

"Feel-good Pop infused with a nostalgic easy listening, California Classic Rock twist"
- **Spill Magazine - Spill Music Premiere:**
TANTRIX - "We Become One"

After meeting through a mutual friend, **Matt Mio** and **Eddie Silver** formed Toronto based alternative pop/rock band TANTRIX in May of 2016. With a long history of being in rock and roll bands both Matt and Eddie began venturing forth into new genres in their song writing.

Responding to their ad on Craigslist, completely by chance, **Gaurav Vaz** joined them in April 2018 to complete their core line up.

All 3 of them are as diverse and engaging as their music, being more than a decade apart in age and hail from countries on opposite sides of the earth.

In true Canadian style, their diverse influences and backgrounds come together to create a very international sound that can be heard in their music production.

"Music that exuberates upbeat pop retro-stylings and infectious melodies. This is music that's confident, enormously likeable, and unafraid to showcase the strong writing talents of Mio and Silver, and as such, deserves your attention"
-**Rob Quicke - New Music Faster:TANTRIX**
